in
Walking with Poles
for Health, Strength & Biological Optimism

Ruthy Alon

Index of Processes for Segment 2

46. Functional Posture	1
Uprightness from T6	
47. Impact from the Ankle	3
Reciprocal Relationship of Ankle–Shoulder Blade	
48. Hip Joint Bow & Arrow	5
Involving Head with Hip Joint by the Ears	
49. Aligning the Neck	7
Mobilizing the Skull Backward	
50. Gap Between the Hands	9
Securing Decompression of the Lower Back	
51. Pre-Pole-Use Walking	11
A Variety of Patterns to Improve Self-Organization	
52. Morning Swings	12
The Consistent Flow	
53. From the Chair to Standing	13
Coping with Gravity through the Spiral	
54. From Sitting on the Floor to Standing	15
The Full Anti-Gravity Challenge	

55. A. Climbing a Slope – Tailbone-Heel Distance	17
Reframing the Anti-Gravity Effort of Climbing into a Continuous Horizontal Flow	
55. B. Stepping Down a Slope	19
Quick Small and Short Steps — as if Running on Hot Coals	
56. Intuitive Walking with Poles	20
Trust the Subconscious Functional Memory of the Organism	
57. Poles in the Wall-Floor Seam	22
Deciphering Dynamic Component of Hand-Foot Interaction	
58. Navigating Stepping Impacts through the Body	24
Designing the Trajectory of Force	
59. Synchronizing One Step Forward in Crawling on all Fours	25
The Winning Evolutionary Algorithm for Mobilization	
60. Morning Swings — Long Distance Walking	28
Locomotion Wave in a Whip Pattern	
61. Crossed Pushing	30
Uprightness from the Neck’s Roots in the Upper Back	
62. Arm Rotation Near a Wall	32
Foot–Shoulder Correspondence	
63. Hip Joint on Elevation	34
Suspending Pelvis from the Leg	
64. Pulling Out the Cork from a Bottle	
 Hanging a Picture on the Wall	36
Releasing Your Full Postural Length	
65. Scanning Height of a Tree	38
Proportional In-curve of the Spine	
66. Hand Pulls a Leg, Leg Pulls a Hand	40
Hand–Leg Reciprocal Relationship	
67. Frustrated Ski	42
Increasing Zone of Security	
68. Elbows in the Creeping Function	44
The Winning Model of Evolution	
69. Shoulder Dance	47
The Dynamics of Shoulders in Walking	
70. Stomach Lift	49
The Legitimate Permission for Eating	
71. One Shoulder Blade, Diagonally	51
Rejuvenation near a Wall	
72. Tearing Paper with your Toes	53

73. Latihan	54
The Movement that Moves You	
74. The Dynamics of Taking One Step Forward on All Fours	55
Deciphering a Way to Outsmart Gravity	
75. Low Poles	58
Simulating Walking on all Fours	
76. Relaxation	62
Take a Break from Walking	
77. The Factor of Springiness in the Shock-Absorbing System	63
The Choice to Make a Soft Landing	
78. Reversed Figure-8	65
Multi-Dimensional Articulation	
79. Stable Leg and Mobile Leg	68
Neurological Diplomacy	
80. Poles Straighten Back	70
Let the Poles Work for You	
81. Hip-Joint Bicycle Circles, Backward	71
Emergency Help in Time of Need	
82. Tapping Shoulders to the Floor	73
Walking Initiated from the Shoulder Blades	
83. Balance in Consecutive Steps	75
Dynamic Stability as Resourcefulness to Take on Risks	
84. Cha-Cha Chickens	77
Dynamic Security	
85. Balance on One Foot	79
Walking is the Capacity to Stand on One Foot	
86. Running Behind a Chair	81
Renew Your Body in a Few Minutes	
87. Running Quickly and Slowly	82
Surrender to Gravity to Save Energy	
88. Hopscotch Between Squares	84
More Competency in Playing	
89. Design Your Posture with Your Own Two Hands	85
Navigate a Streamlined Force through Your Axis	
90. Self-Cradling in the Wrap	87
The Ultimate Equilibrium
